

MESSAGE BROADCAST TO MOBILE STATION IN WIRELESS NETWORK**ABSTRACT OF DISCLOSURE**

A wireless network that broadcasts a message from a telecommunication system to mobile stations associated with the wireless network is provided. The wireless network includes one or more mobile switching centers, one or more base stations, and one or more mobile stations. In various embodiments, the telecommunication system may include an emergency alert system and/or a public switched telephone network along with the wireless network. The message may include a presidential message, a local area message, a state message, a national information center message, a weather news report, a headline news report, a traffic news report, or a promotional advertisement. Several methods for broadcasting the message in a wireless network are provided.
